Follow-up to April 2018 Safety Concerns

## SAFETY CONCERNS

1. Casey Koss:

   Dim lighting near courts in Visitor/ Staff Lot #4 has been a concern with library staff. Light coming from courts is obstructed by trees, so a new light may need to be put in place or trees may need to be trimmed. Remedy assigned to Building Services. The trees in this area were trimmed (2x) to roof level where lights are located. However lighting is still poor. The Facilities Director approved a quote for $28,500 to add additional lighting for this location. PO is still pending.

2. Ruth Barnaba:

   Since January, there have been more reports of marijuana smell around campus especially in the library's stair well. Derrick Johnson reiterated that Palomar College is a "No Smoking Campus," and Chief Moore clarified that it is not legal to smoke marijuana in public. Both Johnson and Chief Moore advised to contact Campus Police when dealing with marijuana smells on campus. No additional actions needed.

3. Dan MacNeil:

   MacNeil asked about students using sharps containers in classrooms that are intended for classroom work as a public sharps container. Johnson mentioned that, in its sharps safety information to students, Health Services will include that students should be disposing of their personal sharps in their own personal containers or in a future sharps container located near Health Services. Education and training will be the first tools in solving sharps safety issues. Still pending.

4. Tamara Holthaus:

   Holthaus shared concern about people hanging around the access road next to The San Marcos Early Childhood Education Lab School. The advice given was to follow "See Something, Say Something" and contact Campus Police when witnessing people loitering on the access road. No additional actions needed.

5. Chief Moore:

   Chief Moore requested the installation of about 5 cameras for outside main student courtyard as a first reading. Having cameras allows for greater security. This request will be put on the Infrastructure Teams priority list instead of being added to the S&S for 1st reading.

6. Chris Miller:

   Miller complimented Chief Moore on his involvement in the April 3rd, 2018 town hall meeting. Lot 12 parking structure cameras are being worked on by Information Systems. Plans for new monument signs near Transit Center, Borden Road, and Las Posas Road may have possibility for license plate readers. Elevators in the Natural Sciences (NS) building do not currently have a timer,

and students are able to access parts of the building when they should not be accessible. A timer will be set for the NS elevators. There was a request to install special locks on faculty office suites in The Multi-Disciplinary (MD) building. The request is being taken to VPs and President Blake. Chief Moore brought up a concern from the April 3rd town hall meeting. The concern was of people gaining access to building roofs. Facilities has gone around and locked access to roofs. New safety features include card readers in the newly built buildings on campus.
No additional actions needed.

7. Derrick Johnson:

   Future sidewalk near parking structure where Comet Circle used to go through was discussed since students are walking through street. Plan has already been established.
   No additional actions needed.
