Agenda Item E.1

Intruder Defense System, Commercial Doors With Scissor Closers, DCS-1 $63.95 on Global Industrial

The Bilco® Company has teamed up with Troy Lowe, a military veteran and SWAT team member, to manufacture door security devices that he designed based on his experience as a law enforcement professional and an active-shooter training instructor. These locking devices can be installed in a matter of seconds in emergency situations to protect occupants against building intruders.

The DCS is designed to be used in conjunction with the DSI or DSO to provide an additional level of security. Due to the wide variety and inconsistency of door closers and their fasteners, **it is not recommended to use the DCS as a standalone solution.**

Benefits:

- The fastest and easiest way to secure a door in an emergency situation
- Simply slide the device over the closer on a commercial door to prevent the scissor action
- Buys time for installation of either the DSI or DSO

Features:

- Models available for scissor action door closers
- Heavy-duty steel construction
- Durable powder coat paint finish
- Lightweight for easy positioning
- Supplied with convenient wall-mounting rack

Other Options

- **The Sleeve by Fighting Chance Solutions $83**
  - Deploys quickly and easily
  - Tested to withstand over 550 lbs. of external force
  - Laser-cut out of solid 12 gauge carbon steel (.104” thick)
  - Finite Element Analysis (FEA) tested
  - Industrial-strength rubber pads
  - Proudly manufactured in the USA
  - Patented design and function
- **Recycled Fire Hose**
  - Deploys quickly and easily
