

## Life Sciences Prerequisite Information

### Enrollment procedure change for the following courses:

- Microbiology 200, Fundamentals of Microbiology
- Zoology 200, Anatomy
- Zoology 203, Physiology

Prerequisite verification is now being enforced at the time of registration. Students will be blocked from enrollment in these courses unless their computer records indicate successful completion of the prerequisite course work.

Students who have completed prerequisite course work at another institution must provide transcript evidence to the **Evaluations Office** within the Admissions & Records Office. This must be done before attempting to enroll in the course, at least 2-3 days prior to their registration appointment date. "Prerequisite Evaluation Request" forms are available in the Evaluations Office, SSC-40.

For more information, contact the Evaluations Office at 760-744-1150, x2165, or at [evaluations@palomar.edu](mailto:evaluations@palomar.edu).
