

Palomar College

This agreement contains transfer related information for Brandman University, [formerly Chapman University College](#) and applies to any of the locations throughout California and Washington and includes online programs. Information in this agreement does not apply towards Chapman University (Orange, CA).

Associate Degree Block Transfer

Brandman University awards a minimum of 60 semester credits for successful completion of an Associate degree from regionally accredited colleges and universities. The coursework toward completion of the Associate degree will be evaluated for general education and major requirements. The remaining credit needed to reach 60 credits will be added to the record as general elective credit. Additional coursework from regionally accredited colleges and universities beyond the Associate degree will be individually evaluated for credit. Degree must be completed prior to the completion of the student's first term as an admitted BU student.

GE Block Transfer

Brandman University accepts full CSU or UC IGETC certification or Washington State DTA Associate degrees in lieu of its general education requirements, with exception of LBSU 300, if completed prior to matriculation.

Transfer Guides

In addition to the policies outlined above, Transfer Guides detailing GE course approval and major prep courses will be updated every one to two years or as needed and are available online at <http://www.brandman.edu/transfers/>

Course by Course Transferability

Brandman's transfer course database lists courses reviewed for transferability and is available for search through [WebAdvisor](#). Two search options allow you to review transferability for current courses from Palomar College or view a list of all the approved equivalent courses for a specific Brandman course.

[WebAdvisor](#): Log on as a guest and select one of the two search options for Brandman University Transfer Courses

Direct equivalencies are used for transfer courses that are equivalent to Brandman courses and carry all of the same approvals for GE and major as the Brandman course.

Other transfer equivalency codes are assigned to courses that do not equate to any Brandman course but may still be eligible for transfer and application towards degree requirements. You may check the [Transfer Course Codes](#) for an explanation of the equivalency codes assigned.

Please note that courses listed on the Transfer Guides as satisfying a course requirement may not be directly equivalent to the BU course and may not appear on WebAdvisor as a direct equivalency. All approvals are one-way transfer to Brandman and do not guarantee transfer of Brandman courses to Palomar College.
