

## **Articulation Agreement Chapman University College and Palomar College 2008-2009**

This articulation agreement contains transfer related information for Chapman University College (CUC) and applies to any of the locations throughout California and Washington. Information in this agreement does not apply towards Chapman University (Orange, CA).

### **Associate Degree Block Transfer**

Chapman University College awards a minimum of 60 semester credits for successful completion of an Associate degree from regionally accredited colleges and universities. The coursework toward completion of the Associate degree will be evaluated for general education and major requirements. The remaining credit needed to reach 60 credits will be added to the record as general elective credit. Additional coursework from regionally accredited colleges and universities beyond the Associate degree will be individually evaluated for credit. Degree must be completed prior to the completion of the student's first term as an admitted CUC student.

### **GE Block Transfer**

Chapman University College accepts the full CSU or UC IGETC certification in lieu of its general education requirements (with exception of the Writing Proficiency Exam and LBSU 300) if completed prior to matriculation.

### **Course by Course Transferability**

Chapman's transfer course database lists courses reviewed for transferability and is available for search through [WebAdvisor](#). Two search options allow you to review transferability for current courses from Palomar College or view a list of all the approved equivalent courses for a specific Chapman course.

[WebAdvisor](#): Log on as a guest and select one of the two search options for University College Transfer Courses

Direct equivalencies are used for transfer courses that are equivalent to Chapman University College courses and carry all of the same approvals for GE and major as the Chapman course.

Other transfer equivalency codes are assigned to courses that do not equate to any Chapman course but may still be eligible for transfer and application towards degree requirements. You may check the [Transfer Course Codes](#) for an explanation of the equivalencies codes assigned.

Please note that courses listed on the Articulation and Transfer Guides as satisfying a course requirement may not be directly equivalent to the CUC course and may not appear on WebAdvisor as a direct equivalency.

### **Articulation and Transfer Guides**

In addition to the policies outlined above, Articulation and Transfer Guides showing course approvals for GE and major requirements were submitted for the following programs. The transfer guides for the various degree programs include a list of CUC campuses that offer the program. Not all programs may be offered at the nearest Chapman location. Underlined programs listed below are offered fully online.

**General Education**  
**BA Applied Studies**  
**BS Computer Information Systems**
