

HOW TO GET A WEBSITE FOR YOUR CLUB

Palomar College offers free website hosting for all student clubs. A club officer or advisor can request to have a new club site created by emailing Chris Norcross at cnorcross@palomar.edu.

When requesting a new club site, specify whether you want a WordPress enabled site or a standard site. Also, please provide a list of the club members/advisors that will need to manage the site, (For students include their name and student ID number; for advisors include their name and Palomar email address).

An index of existing clubs with websites can be found at <http://clubs.palomar.edu/>.

FAQ

What is the difference between a WordPress enabled site and a standard site?

WordPress is software you can use to create a site quickly and easily. Very little experience is necessary to use WordPress effectively. According to the makers of WordPress more than 25 million websites around the world run on WordPress. More information can be found on the WordPress website at <http://www.wordpress.org/>.

A standard site requires someone with web editing software (Adobe DreamWeaver, Microsoft Expression Web, etc.) and the skills necessary to create and manage a website. While not as user friendly as WordPress, it does offer complete control over every aspect of your site.

How much space is allowed for a club website?

Each club is allowed 1 GB of space on the server. If more is needed contact Chris Norcross at cnorcross@palomar.edu
