

## Course Information

Students are held responsible for understanding and fulfilling all requirements presented herein, and for understanding and fulfilling any changes in those requirements which may have occurred since the printing of the catalog. Students are advised to check at the division or department levels for these changes.

### Course Numbering System

Palomar College operates on a semester system. The course numbering system has meaning with regard to level and transfer. The college numbering system, effective summer 1990, is as follows:

1 – 49: Remedial or college preparatory courses which do not apply toward an A.A. degree and which are not intended for transfer to another community college or four-year college or university.

50 – 99: Courses which apply toward an AA degree but which are not intended for transfer to a four-year college or university.

100 – 299: Courses which count toward an AA degree and/or are intended for transfer to a four-year college or university (refer to Transfer Identification below). Freshman-level courses are generally given numbers from 100 – 199, and sophomore-level courses are generally given numbers from 200 – 299.

Courses numbered 100 through 299 are intended as lower division transferable course work. The final decision in regard to transferability rests with the institution to which the credits are transferred.

Numbers in parentheses indicate the units granted for a course.

### Transfer Identification

Courses at Palomar College which transfer to public four-year universities in California are identified at the beginning of each course description with the abbreviation CSU and/or UC.

The notation CSU means the course will transfer to the 23 campuses of the California State University system.

The notation UC means the course will transfer to the 9 campuses of the University of California system.

### California Articulation Number (CAN) System

The California Articulation Number System is one of several intersegmental projects designed to aid students in transferring between California's higher education campuses without loss of time, credit, or duplication of effort. The CAN system is a statewide numbering system independent from course numbers assigned by local colleges.

A CAN number signals that participating California colleges and universities have determined that courses offered by other campuses are equivalent in content and scope to courses offered on their own campuses, regardless of their unique titles or local identifying numbers. Thus, if a schedule of classes or catalog lists a course bearing a CAN number, students on one campus can be assured that it will be accepted in lieu of the comparable CAN course noted in the catalog or schedule of classes of another campus.

The CAN numbering system is obviously useful for students attending more than one community college and is applied to many transferable, lower-division courses students need as preparation for their intended major. Because these CAN courses may change, students should always check with their campus' counselors.

Students should consult the ASSIST database at [www.assist.org](http://www.assist.org) for specific information on course agreements. The college counseling staff will help students interpret this information.

### CAN Courses

Following is a list of Palomar College courses qualified in the CAN system at the time of catalog publication (subject to change).

<u>Palomar College Course</u>	<u>CAN Course</u>
