00:03 In order to understand the Palomar College academic maps. It's important for students to know that the first thing they should really look at is the name of the degree or certificate which should be listed on the top here.

00:17 If there's a new student coming to Palomar College we highly recommend that you take the course sequence based on the semester of list of classes that are listed.

00:25 For example, in semester one, English 100, math, which is a district requirement to get the Associate's degree. Either you could take MATH 56 or higher, as long as that covers GE and covers for

00:40 The Associate's degree general ed. So if we look at the associates degree gentle advising guide math as a requirement for the district as well as area A2 within the general ed requirements.

00:53 If you don't know what math to take for your major. It usually gives you an option here. However, if your major requires a specific math, it would indicate the course number here. But in this case, you get to choose any number (MATH) 56 or higher.

01:09 Then you have the major coursework that are listed. In this case, you'll see the course number and the subject here. If you are already taking these classes, you can simply go on to semester two and look at what other major coursework needs to be completed.

01:27 In regards to other general education like English. If you've already taken AP scores with a three or higher, that satisfies English 100 and look at the course notes information here as well.

01:40 So you simply follow the math sequence. If any other questions that you have pertaining to your major degree,

01:48 You can always take the snap and show your professor who teaches the actual degree or you can meet with the counselor by booking a scheduling an appointment at the counseling office.
