

IGETC Mapper Recording Transcript

00:03 In order to fully understand the Palmer College academic maps for transfer. It's important that you look at the name of the degree or certificate on the top.

00:13 And in this case it's the as AS-T in Biology. This is for students who want to transfer to major in biology or simply complete an Associate's degree in Biology at Palomar

00:25 Using this advising sheet for transfer students, we would like to use the IGETC. The IGETC fulfills both CSU, UC, and most of state universities.

00:36 And so what we want to ensure is that your general ed is already embedded and within the maps.

00:42 In order to look at the advising guide, you can use it as a reference. But it's really important for you to follow the maps.

00:49 The maps has already embedded a lot of the Gen Ed, such as English 100 you'll notice here on semester one course sequence. English 100

01:00 Also means if you have an AP score of three or better in English, then this requirement is not needed. For students who have previous college credit courses, it's important that you meet with a counselor to see what is still needed

01:16 And simply for students who are new, they can just continue to follow the what listing of classes is embedded within the maps for each semester.

01:28 If you have any questions, it is important to either ask your discipline instructor in biology, for example, or you can also ask a counselor. We're here to support you.
