2	GEOG 145	LiDAR Data Processing and GIS Integration	GEOG	Proposed for Drone Applications and Technologies A.S., Advanced Geographic Information Systems A.S.	CSU	No	No	Grade/Pass/No Pass	No	Light Detection and Ranging (LiDAR) is a remote sensing technique that is increasingly used by unmanned aircraft systems (UAS) and Geographic Information Systems (GIS) professionals to gather highly accurate data used in the reconstruction of three dimensional objects. These reconstructions are used in industries ranging from construction and inspection to forensics and crime scene mapping. Members of the Palomar GIS advisory committee and the Palomar UAS advisory committee reviewed the proposed course outline, and concurred that knowledge of this specialized skill can enhance the job competitiveness of graduates from Palomar's GIS and UAS programs.
