Credit New	SOC	180	Social Justice Statistics		CSU	Yes	G/P/NF	No	The purpose of the course is to expose students to social issues through a social justice lens. Students will be empowered to actively engage in the exploration of real data and to anticipate patterns in a social context. Students will describe and interpret authentic data patterns and deviations from those patterns using graphical and numerical representations of their positionalities. Students will be exposed to probability and tests of statistical significance to explore social inequality such as systemic forms of racism, sexism, and other forms of social oppression. Using anti-oppressive principles, students will actively learn to use data in the pursuit of social justice and change. This course allows students to understand participatory action research, an activist approach that seeks to engage and empower the community. Credit New	WTE	51	Career Pathways in Water Technology	No	No	Yes	G	No	The water and wastewater industry is one that most people are unaware of. This course introduces students to the many career paths in the industry. The Association of California Water Agencies estimates that there are over 7,000 job opening each year in the California water industry, many of those are here locally. These positions not only pay livable wages, but most include benefits such as medical, vacation, and retirement. This course not only brings awareness to these career opportunities, but also prepares students with the skills needed to obtain, but also succeed in that position. Many students who attempt to enter the water and wastewater industry often lack the skills needed to land a job. Some have experience working with their hands, but need additional assistance when it comes to their writing and communication skills. Others are new to the workforce and also need the additional assistance required to obtain a job.	No	Jacob Shiba	Fall 2022	5/19/2021	Yes	6/1/2021
