## **Content Review Conversation Starter**

Based on the COR, content review requires that faculty examine aspects of the course to learn where students need to come prepared with certain skills and knowledge sets rather than learn the skills while taking the course. Conversation-starter questions have been prepared to assist with the process of content review when faculty are reviewing a course and believe that certain basic skills are necessary for student success.

Element of the COR	English Composition	Mathematics	Reading
Course Objectives	Does the objective require the	Does the objective require	Does the objective require the
	students to write clear, thesis	students to be proficient with	students to complete college-
	driven writing assignments	a calculator?	level writing assignments
	organized in academic form?		based on written materials
		Does the objective seem	(textbooks, primary sources,
	Does the objective require	quantitatively based – will the	secondary sources, etc.)?
	students to incorporate or	student need to be	
	synthesize other texts in order	competent in a range of	Does the objective require

	relationship to the assertions		summarize the text?
	in the essay?	Are making and analyzing	
		graphs integrated into the	

	Does the objective require students to demonstrate competence in standard written English in terms of grammar, punctuation, and other conventions? Does the objective require	objectives? Linear graphs? Nonlinear graphs?	Does the student need the ability to identify the thesis in the article and the main ideas in the sections of the text? Does the student need the ability to identify supporting
	correct documentation of sources in the citation form of the discipline?		evidence used to validate the assertion?
			Does the student need the ability to draw reasonable inferences from the text, inferences based on evidence offered?
			Does the student need the ability to determine bias and world view in the text based on the evidence provided?
			Does the objective require students to conduct research and include researched material in assignments based on written materials (textbooks, primary sources, secondary sources, etc.)?
Course Content	Do elements of the content link easily to general essay writing skills (i.e. grammatical	Are elements of the content easy to link to math skills (i.e. finding percentages, graphing,	Do elements of the content link easily and explicitly to reading skills (i.e. understand

	competence, organized and clear written communication, use of evidence, etc.)? Do elements of the content implicitly require higher level writing and thinking skills such as synthesis of ideas and researching Does the course require specific writing skills or a specific type of writing, or is an overall background required?	calculating certain quantities, etc.)? Are elements of the content implicit about math skills that students need (ask the discipline faculty to explain what is going on)? Are specific skills necessary or an overall background? Can the skills be isolated? Can the discipline faculty teach the concept? Can a math faculty visit the course for one hour or day to teach it?	and paraphrase main ideas; identify and learn supporting details; summarize college- level written texts)? Do elements of the content implicitly require college level reading skills (research of written texts, essays based on reading assignments; broad detailed mastery of textbook information; analysis, integration, and synthesis of multiple written materials, even if texts are below college-level; understand and apply theories, concepts and critical analyses of college- level reading). Does the course require: specific reading skills determined by test or assignment purpose? A specific type of text? Or an overall experience in reading college-level texts?
Methods of Evaluation	Students must express their understanding of the course	Students must know how to complete certain calculations	Students must express their understanding of the course
	content though college-level,	with or without a calculator	content through college-level,
	academic writing	on exams.	academic writing assignments

	assignments. Students must express their understanding through in- class writing such as essay exams. Students must know how to locate outside resources relevant to the course content, document their research properly, and incorporate that research into their writing clearly and effectively	Students need to interpret graphs, make graphs on tests or in reports, organize data, report data. Students have equations to solve on tests, quizzes, or other assignments: linear equations? Nonlinear equations? Students must demonstrate knowledge of fractions and conversion of fractions (measuring, applying correct tools, etc.)	based on written materials (textbooks, primary sources, secondary sources, etc.) Students must know how to locate outside resources relevant to the course content (determining a source's relevance is linked to a sophisticated reading level.) Research papers, essays Bibliographies
Assignments	Essays Research papers. Essay exams Bibliographies or other research assignments.	Conducting elementary research. Reporting results of surveys, lab tests, etc. Producing quantitative information in graphical, numerical or paragraph form. Homework exercises include quantitative problem solving,	Expected types and levels of reading materials outside of class.

		applications or word problems.	
Required Texts and Other Instructional Materials			College-level textbook
			College-level primary print sources (journal articles, etc.)
			Primary and secondary print sources not at the college- level, but critical analysis is required.
Other	What level of critical thinking is expected?	What level of critical thinking is expected?	What level of critical thinking is expected?
