

2009-2010 Instructional Program Review and Planning Supplemental Form

Please complete this form for each priority you identified in the 2008-2009 progress report (review these at <http://www.palomar.edu/irp/IPRPSupplementalReport.htm>). Please list at the end of this form the faculty and staff who participate in this report. Forward (1) a hard copy to Instructional Services and (2) email a Microsoft Word copy to jdecker@palomar.edu no later than 3/05/2010.

Department Behavioral Sciences	Department Priority # 1	<input type="checkbox"/> No funding/resources are being requested
Program/Discipline: Archaeology Program and Anthropology		Program/Discipline Priority # FOR 2010-2011: 1

To establish a priority, use the current Program Review and Planning (PRP) document submitted Spring 2009 (posted at <http://www.palomar.edu/irp/IPRPSupplementalReport.htm>) for this program or discipline. Identify from Box #2 in the PRP a priority for the upcoming academic year or develop a priority based on the data analysis discussed in Box #2.

***2. Data Analysis (restate or summarize the data analysis from the PRP):**

The Anthropology Department has very good retention rates; the Archaeology Program continues to have an increase in the number of Certificates Awarded and the program remains strong.

***3.a/b. Describe your goal (priority) based on data analysis from the PRP:**

Both the Archaeology Lab/Program and the Biological Anthropology Lab/Program need additional equipment and supplies to provide an adequate hands-on experience for students taking lecture and lecture-lab classes in Archaeology and Biological Anthropology in order to satisfactorily implement SLOs for Biological Anthropology (ANTH 100, 100L, 101) and the Archaeology Program (ANTH 100, 100L, 101, 110, 120/205, 210/220, 215, and 225), especially with the move into a larger and better equipped Archaeology Lab -- the current one is too small to actually house some the equipment that we need). New fossil finds require that our collections be updated to reflect the current state of research in the field. It is also critical that our technology and equipment match current standards in the field so that are students are truly prepared for the job market.

Resources requested: Identify all the resources you are requesting to support the implementation of this priority. These resources would be additional funding needed beyond what is already provided to the discipline through the base resource allocation process. 2009-2010 Instructional Program Review and Planning Supplemental Form

How will you evaluate whether or not you have met your goal/priority with the requested resources?
 These resources are required for us to meet the needs of our students and successfully implement course SLOs. These resources are needed to match course content. A student survey will be developed, similar to what CSIS is doing, to evaluate student satisfaction with the technology, courses, and program.

What evidence will you provide to reflect the impact these resources had on student learning?
 Through surveys of student satisfaction with the availability of the technology and/or supplies provided, and to the extent it improves student learning outcomes for our courses.

6. Reflect on the progress your discipline and/or department is making on defining, implementing, and assessing course, program, GE/Institutional level SLOs. What have been the benefits and what have been the challenges?
 We have completed all of our course SLOs, but the Program SLOs for the Archaeology Program remained to be written. This will be done in the next couple of weeks. The Anthropology Discipline is currently assessing two SLOs for ANTH 100, 100L, and 105 this semester.
