

Caregiver Needed

If you love generally helping people (especially young ones) and like to learn new things, this could be a great fit for you!

We have a unique household where we need a caregiver for a mom of two grade school-aged children. Mom is named Amanda. She is 45, quadriplegic, and very active with her children. No prior caregiving experience is required as we feel confident teaching you everything she needs, which includes helping in the bathroom, meal prepping, feeding, driving, lifting (in some cases) and playing with her kids!

We provide all meals and we have an option for 50% of health insurance premiums.

We prefer employment to last at least one year, if not longer, but this is not mandatory.

We prefer vaccinated assistants, or at least ones willing to be vaccinated. If you are not willing to be vaccinated, we would love to discuss any possible workarounds.

We are currently requiring our assistants to wear masks. Also, it's definitely a big plus for assistants to be physically fit!

The shift opening up in December is a weekend position, but it's every other weekend. The shift begins at 9 AM Saturday and ends at 5 PM Sunday. There is time allotted for plenty of sleep during that overnight. There will be a more overnights opening up soon as well if you are looking for more hours.

Thank you and we look forward to hearing from you! Please include a phone number and former experience, if any, in your response. Please send all inquiries to AmandajSalas@yahoo.com.
