Job Description: I am looking for a mature nursing student to be with my husband while I go out for a few errands, or perhaps meet a friend for lunch. He is 76 years old and has progressive supranuclear palsy. Maintaining his safety is my main concern. I would have him ready in terms of physical care like bathing etc. He is in a wheelchair 75% of time and walks with SUPERVISION with a U-STEP walker. He is helped at meal time. I would orient to the facility and the staff is a button call away and would be available. I would like someone who would watch TV with him, give him the paper to read, take him to an activity if same were happening etc. I am looking at daytime hours...3-4 at a time and the frequency can be prn or we could set up a schedule.

Thank you for considering working with us. Compensation is \$20.00 an hour.
