Entry Level Front-end Web Developer - Full time/part time & Intern positions available

Looking for a student or recent graduate who has strong technical design skills and wants to create reliable and scalable web-based solutions. We want someone to be versatile, enthusiastic to take on new problems. Be curious about how systems work and how they fail. Be eager to learn new technologies and solutions. Be detail oriented, and you should be proud of the work you put out. Be able to develop and modify cloud-based software, primarily for the Department of Defense. They are required to work in teams alongside back-end developers to ensure all elements of web creation are consistent. This requires excellent communication and interpersonal skills. This position will be primarily focused on designing and implementing modern front-end features to our products. We need someone who has experience in JavaScript, HTML and CSS- and has worked recently with Vue.js. The entry level position is a full-time with benefits, working in our corporate offices in Bonsall.

Required Requirements:

- Interested in or pursuing a degree in computer science or related fields
- Proficiency in JavaScript, HTML, and CSS
- US Citizen

Preferred Requirements:

- Front-end Frameworks: Vue.js and Bootstrap
- JSON
- Node.js
- C#
- Microsoft .NET
- Restful API Development
- Knowledge of government acquisition and procurement
- Work in a fast-paced environment
- US Citizen eligible for a Secret level security clearance

Ideal Candidate

- Self-starter with strong desire to learn new technologies and techniques
- Passionate about technologies
- Excellent analytical and multitasking skills
- Experience with responsive and adaptive design
- Good problem-solving skills
- Communicate effectively both verbally and in writing
- Ability to work with tight deadlines

Job Tasks

- Collaborate with back-end developers to improve software
- Write functional requirement documents and guides
- Integrate API

- Design, implement, and maintain the user interface
- Validate business workflow
- Fixing bugs and testing

This job description is intended to describe the general requirements for the position. It is not a complete statement of duties, responsibilities, or requirements. Other duties not listed here may be assigned as necessary to ensure the proper operations of the department.
