

TLC ESCONDIDO PRESENTS:

The Whales Came Back... Their Genes Did Not

A Skillshop on Genetic Drift and Population Recovery

Facilitated by Lucas Carrillo Salado, STEM Tutor

Tuesday, April 7, 2026

11:30am-12:30pm, Rm., 202 & HyFlex

You Will Learn How To:

- *Define genetic drift and distinguish it from natural selection*
- *Explain why population size matters for evolutionary randomness*
- *Describe how allele frequencies change over generations*
- *Understand why genetic diversity—not just population size—matters for long-term survival*
